SALARY ARBITRATION AT MLB

PYTHON 101

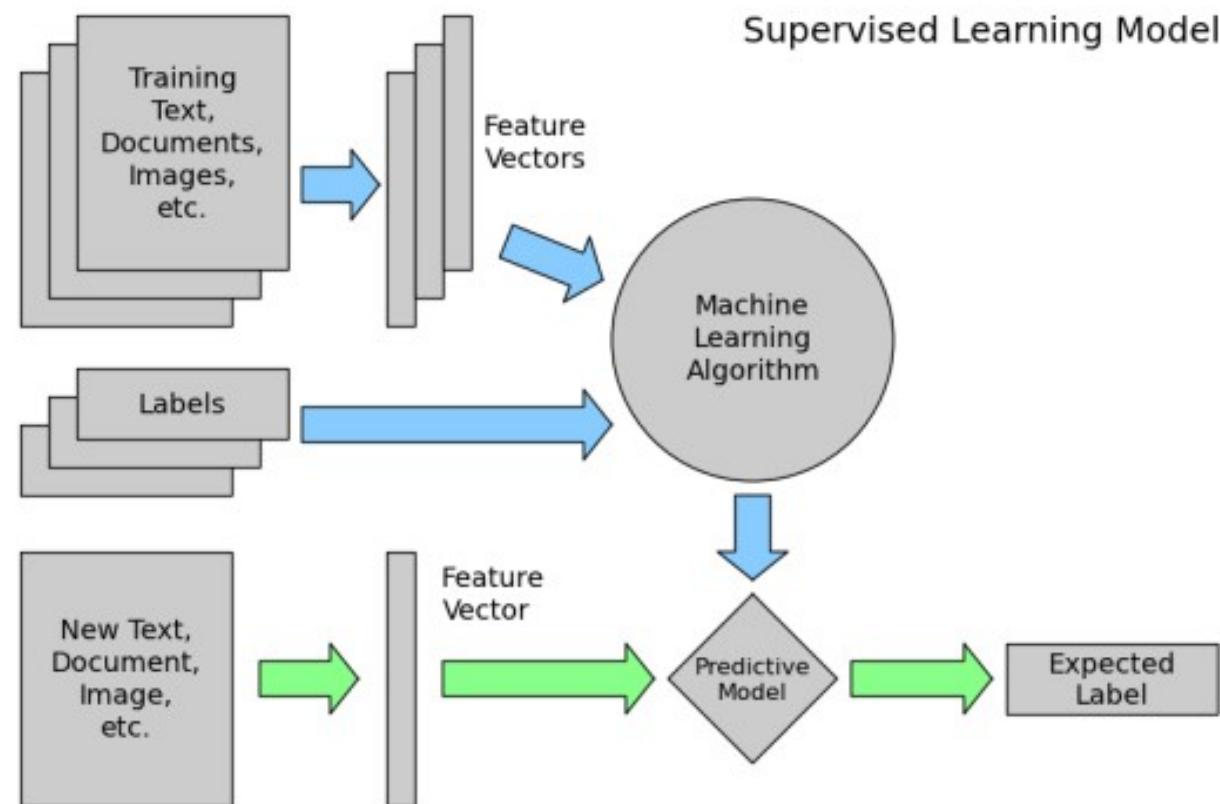

1. Quick intro to Python

We will start with a quick introduction to python programming languages and discuss some components that we will be using for the rest of the semester. At the end of this notebook, there is a supplement video that goes over the same concepts in slightly more depth. You are advised to go through that material, understand this notebook, and start tinkering with it (in the same order).

SALARY ARBITRATION AT MLB

CASE TASK

How well can we predict
whether a given case will
result in a filing?

In your learning teams...

CASE TASK

Team Tasks:

- 1) Build best possible model

- 2) On Tuesday's Zoom class, odd numbered teams will make case **for** use of their model, even numbered teams will make case **against** use of modeling for this task

CASE TASK

Team Tasks:

For Tuesday, make a case for/against based on:

- 1) Model metrics on test data (all or subset)
- 2) How the model might be used/misused
- 3) Possible benefits/costs

Email me a short list of 2-4 points before Tuesday's class. We'll discuss on Zoom.
